## Project Snapshot: Aberdeen Proving Ground

### Facilities Maintenance Management

VanJoh provides services to capture, manage and track: inspection, maintenance and repair. AT APG, VanJoh’s support includes Preventive and Demand Maintenance Management through the FMS System (a VanJoh Developed Web Based Software) and GFEBS (Plant Maintenance). Our services include Equipment Survey & Tagging, Work Force Scheduling, Warehouse Operations and GFEBS Material Management. Other services include Work Order Issue, Tracking and Closeout . Additional services include setup and development of Job Plans and PM Schedules in GFEBS and management of Warranties, O&M Manuals, photos, drawings and specifications.

### Planning and Space Management

Our services include management and completeness of the ARMY’s ePRISMS populated with over 12M GSF of mixed use space. VanJoh’s services include Army enterprise systems support, system inventory analysis, real property audit support, floorplan data collection and development, data validation and update, data reconciliation and correction, DD1354 support development, real property survey and analysis, facility utilization and unit analysis, facility condition reporting, real property planning services, technical support, and on-site investigation. Our services also include updating GFEBS (Real Property) with all summarized RPI results (rental & pooled space). Other services include DD1391 and DD337 Support, Facility Reduction, Enhanced Use Leasing, CFOA Audit Readiness Program Support, Real Property Reporting, Inventory Management, Disposal Actions, Space Management and Assignment Re-Assignment Documentation Support.

### CADD Services

VanJoh provides a full range of CADD & Surveying Services using MicroStation v8i to provide preliminary engineering and conceptual drawings of capital plans and projects for Laboratory, Warehouse, Administrative and other infrastructure assets, As-Built Data Management (over 70,000 drawings), and CADD conversion. Other services include Large Format Scanning & Printing to include On-Site Training. Other services include acceptance, tracking and management of all Project Close-Out deliverables through VanJoh’s Web Based Tool. These services are essential for DPW planning, management, and day-to-day operations.

### Enterprise Solutions

At VanJoh we understand the value of Workflow Process Tracking. We believe it is essential to manage and track our projects by developing Web Based Software Solutions to ensure complete and effective results. Our DPW Work Order Website Development and Web Based Tracking Software Solutions have provided the necessary tools to insure project focus. Our **Facility Management System** (FMS) Software, RPI Survey & Project Close-Out Tools and On-Line Web Based Project Management provide an end-to-end solution for project tracking, real property management and asset maintenance management.
